

The Mamos

The Mamos are people who have an energetic spiritual elevation. They are the spiritual leaders of the community that act as doctors, psychologists, priests and/or judges. Since a very early age they are taught to perceive the vibration and energy of all natural beings.

This knowledge of the laws of nature has been nurtured for many generations and we do not want it to cease or be lost.

Our elders tell us that the Earth is like a human being, a living creature and for her to be in harmony, we as her children work on harmonizing her 2 or 3 times a year at the sacred points of our land (link to the heart of the earth). Everyone participates, even young girls and boys.

The Mamos possess the knowledge and wisdom to make this harmonization in certain places, and now we want the people from around the world to become conscious.
